Red Industries has, with effect from 17th December 2018, acquired the share capital of The Environmental Resource Group (ERG). The acquisition brings together two very successful waste management companies to form a stronger waste management operator, strengthening our combined position in the market place and providing customers with access to a wider variety of waste services and associated ancillary products.

The acquisition by the Red Group includes ERG's waste facilities in Brownhill and Dudley, laboratory, offices, employees and customer base. ERG (including subsidiaries Chemtech, Envirosol etc.) will continue to operate as a wholly owned subsidiary under the branding of the Red Group. The combined activities, facilities, knowledge, and market share of ERG and Red will strengthen our regional and national capabilities and provide a great platform for future growth of the overall business.

Customers will benefit from the combined strengths, service levels, and technical expertise of Red Industries and ERG. Service will continue as usual, with no interruption. Over time you may start to see paperwork and other documentation being updated with the Red Industries logo. Please continue to operate as normal – requests for quotes, sending in POs, booking loads, paying invoices etc. will all continue as usual and you should continue to liaise with your existing contacts.

We look forward to working with you throughout 2019. Where there are any changes to banking details or other information, we will keep you informed and advise in due course.

Kind regards,

*Adam*
